PROJECTS

Centralized HRM Software – (React/Express/Node.js/Mongo)

React Native app with admin dashboard to manage attendance, payroll, MIS, tasks, hierarchy, and accounts in a single platform.

Key Highlights:

- AR & photo-match based attendance
- MIS with 54+ Excel headers & advanced filters
- HR-only payroll processing with admin permissions
- Role/level-based hierarchy management
- Employee task logging & updates
- Accounts handling & automated calculations

SSTPL Main Website – (React/Express/Node.js/Mongo)

- Technology **Stack:** React, Express, Node.js

- Fully **Dynamic & Responsive Design:** Optimized for all devices with an excellent user interface

- Purpose**:** Built for government assessment bodies to showcase business relationships with public and private sectors

- Content **Coverage:** Explains the agency's operations and workflow for SSC-related skill-building batches

- Impact**:** Highlights initiatives that empower rural India through skill development

Performance widget/Analysis viewer — (Auto & Manual)

Salesforce widget. LLS (Low Latency Sync)

- Problem - Inconsistent data Display / manual update
- Action- QA effort widget / salesforce app direct update
- result- ensure and enhanced accurate & reliable function, reduce manual effort
- Impact - improved data Visibility and boosted efficiency

Automated Car Parking (Unity Game Dev.) — (AI / ML Agent)

Real-life mimic of car parking using a raycast system to measure distance of Obj to avoid Collision with other obj.
Main Objective-To Park the Vehicle using a parking spot without Human interference. **Tech used** – C# Script for Functions & ML python for Testing.
